

EXPERIMENT 1

AIM: Installing Vagrant & Creating basic vagrant box using Virtual Box virtualization.

Steps to Complete:

1. Download and Install Oracle Virtual Box 5.x and Vagrant 2.2.7.
2. Check working of Vagrant using `vagrant --version` command.
3. Create a new directory using CMD.
4. Run `vagrant init` command
5. Edit `vagrantfile` and add `ubuntu/xenial64` in box tag.
6. Run `vagrant up` command
7. Run `vagrant SSH` command
8. Run `Vagrant Halt` to stop VM
9. Run `Vagrant Destroy` to delete VM
